SUMMARY

Full Stack JavaScript developer with hands-on experience building web and mobile applications using React, React Native, Expo, Next.js, TypeScript, Node.js, Express.js, PostgreSQL, Sequelize, and MongoDB. Developed projects for e-commerce product management, social media, Indonesian football club profiles, and boarding-house management. Mathematics graduate and former Data Engineer / Data Analyst with experience in SQL, Python automation, Apache Airflow, and business reporting, applying analytical and data-workflow skills to backend development.

SKILLS

Languages: JavaScript, TypeScript, Python, SQL, Java, R, PHP

Front End & Mobile: React, Next.js, React Native, Expo, Apollo Client, HTML, CSS

Back End & APIs: Node.js, Express.js, GraphQL, Multer

Databases & ORM: PostgreSQL, MongoDB, Redis, Sequelize

Operating Systems: Linux (Ubuntu)

Authentication & AI: OAuth 2.0 (Google and Facebook), Gemini AI agent

Data & Tools: Apache Airflow, Power BI, Tableau, Microsoft Excel, Google Sheets, AppSheet, SAS

Spoken Languages: Indonesian; English (Upper Intermediate)

PROJECTS

E-commerce Product Web Application | Oct 2026

E-commerce product management web application built with Next.js and TypeScript, using MongoDB for product storage and supporting navigation and authentication features.

- Implemented MongoDB-backed CRUD operations so product records can be created, viewed, updated, and deleted within the application.
- Built navigation and authentication flows using Next.js to organize product pages and manage user access to the application.

Tech stack: TypeScript, Next.js, MongoDB.

Live Demo: nickzz-git-main-nickz1.vercel.app / GitHub: github.com/nickzadpratama/E-Commerce-NICKZ

Instagroom – Mobile App | Sep 2026

Cross-platform social media application for Android and iOS built with React Native and Expo, featuring photo posts, user search, likes, and follows, supported by a GraphQL API and MongoDB database.

- Developed React Native screens for uploading and browsing photo posts, searching users, and interacting through likes and follows.
- Integrated Apollo Client with GraphQL APIs to retrieve and update application data stored in MongoDB.

Tech stack: React Native, Expo, JavaScript, Node.js, GraphQL, Apollo Client, MongoDB, Redis.

App Build: Expo EAS Build / GitHub: github.com/nickzadpratama/Instagroom-Mobile-App

Football Profile – Web App | Sep 2026

Indonesian football club profile web application built with React and Express.js to present team information, featuring a Gemini AI agent and user authentication through Google and Facebook OAuth 2.0.

- Built reusable React-based views to present and organize Indonesian football club profiles in a consistent, easy-to-navigate interface.
- Developed Node.js and Express.js backend functionality and integrated a Gemini AI agent and Google/Facebook OAuth 2.0 to support AI-assisted interactions and user authentication.

Tech stack: React, JavaScript, Node.js, Express.js, Gemini AI, OAuth 2.0 (Google and Facebook).

Papikos – CMS & Public Web App | Aug 2026

Boarding-house management platform with CMS and public-facing web applications built with React, Node.js, Express.js, and PostgreSQL, featuring search, sorting, filtering, and Multer-based file uploads within an MVC architecture.

- Developed React interfaces and Express.js backend functionality for managing and browsing boarding-house listings, including search, sorting, and filtering features.
- Integrated PostgreSQL to store and retrieve structured boarding-house data and Multer to handle file uploads within the application.

Tech stack: React, JavaScript, Node.js, Express.js, PostgreSQL, Multer.

EDUCATION

Full Stack JavaScript Immersive Program — Hacktiv8 | Jun 2026 – Oct 2026

Bachelor of Mathematics — Diponegoro University | Graduated Jun 2020 | Semarang, Indonesia

WORK EXPERIENCE

Data Engineer — Tazbiya Brand | May 2025 – Jun 2026

- Collected and monitored social media and marketplace advertising spend and sales data to support daily, weekly, and monthly business reporting and analysis.
- Developed more than 10 Python scripts and SQL-based workflows orchestrated with Apache Airflow for recurring data processing and reporting.
- Integrated Python scripts, databases, and websites to improve operational data flows and track costs and revenue daily, weekly, and monthly for business monitoring and planning.
- Maintained shared reporting spreadsheets so employees could access operational data for recurring reports.

HR Data Analyst — PT Mitra Hasil Bumi | Jan 2025 – May 2025

- Developed employee databases and data-entry workflows using Google Forms, Google Sheets, and AppSheet to support HR data collection and updates.
- Created Google Sheets worksheets for payroll, attendance, and leave tracking to organize and maintain HR records.
- Supported candidate interview activities and related HR administration processes.

Senior Data Analyst — PT Cyberindo Aditama | Mar 2024 – Jul 2024

- Analyzed approximately 400,000 active, frozen, and churned customer records using SQL and WPS Office Spreadsheets, producing daily, weekly, and monthly findings for churn analysis and management reporting.
- Validated daily customer datasets and updated contact center calling lists to support reliable outreach data and data-driven operational decisions.

Risk Management — Bank Woori Saudara | Aug 2021 – Oct 2023

- Developed Microsoft Excel macro worksheets to standardize recurring credit risk analysis.
- Monitored debtor data daily, weekly, and monthly to support risk assessments and credit risk analysis.
- Prepared recurring risk profiles, assessments, and reports for management and regulators, including Bank Indonesia (BI) and Otoritas Jasa Keuangan (OJK).
- Produced profit-and-loss projections every three months for Risk Management Committee reports using Microsoft Excel, Python, historical data, and related business information to support banking insights and risk mitigation.

Mathematics Tutor — Freelance | Jan 2021 – May 2021

- Tutored elementary and middle school students in mathematics four times per week.

CERTIFICATIONS & TRAINING

Data Scientist Competency Statement — LSP Digital Kreatif Solusi (Apr 2026)

IBM AI Developer; IBM AI Engineering — IBM (Oct 2024)

Java Programming Language — Enigma Camp (Sep 2024 – Jan 2025)

Microsoft Certified: Power BI Data Analyst Associate (Dec 2023)

Data Science — Johns Hopkins University (Dec 2023)

Google Data Analytics — Google (Dec 2022)
